LAB EXERCISE 1
PATIENT APPOINTMENT BOOKING FORM

Basic Fields Use Case

1. Objective

To design a Patient Appointment Booking Form in Zoho Creator using thirteen Basic Field types and organize submissions in a report for clinic reception and scheduling staff.

2. Problem Statement

Phone and paper-based appointment requests can lead to missing contact details, scheduling conflicts, and incomplete intake notes. The proposed form gathers patient identity, contact preferences, visit type, and availability in one structured request.

3. Scope of the Use Case

- Application Name: Patient Appointment Booking & Clinic Operations Management
- Form Name: Patient_Appointment_Form
- Primary Users: Patients, Reception Staff, Clinic Schedulers
- Report View: Patient_Appointment_Report
- Objective: Capture appointment requests and help staff confirm a suitable provider, date, and time.

4. Basic Fields Used and Their Mapping

The mapping below covers the thirteen Basic Field types used in the appointment request form.

PATIENT APPOINTMENT BOOKING FORM

Basic Field	Form Field Name	Purpose	Sample Value
Name	Patient_Name	Captures patient first and last name	Maya Raman
Date	Date_of_Birth	Supports identity matching	12-Feb-1998
Single Line	Patient_Reference_Number	Existing clinic reference if known	PT-20481
Email	Email_Address	Appointment confirmation and updates	maya.raman@example.com
Phone	Contact_Number	Day-of-visit contact	+91 98765 43210
Address	Residential_Address	Patient contact address	Adyar, Chennai
Radio	Visit_Mode	Selects in-person or telehealth	In person
Number	Number_of_Attendees	Companion count for logistics	1
Multi Select	Preferred_Clinic_Locations	Captures acceptable locations	Adyar; T. Nagar
Drop Down	Appointment_Type	Selects requested visit type	General consultation
Multi Line	Visit_Reason	Short non-emergency reason for visit	Routine consultation
Time	Preferred_Appointment_Time	Captures preferred time window	10:30 AM
Checkbox	Privacy_Consent	Records required data-use consent	Selected

Figure: Illustrative field groups from patient request through clinic scheduling.

5. Form Layout (Section-wise)

Section A — Patient Details

- Patient Name (Name field)
- Date of Birth (Date field)
- Patient Reference Number (Single Line field)

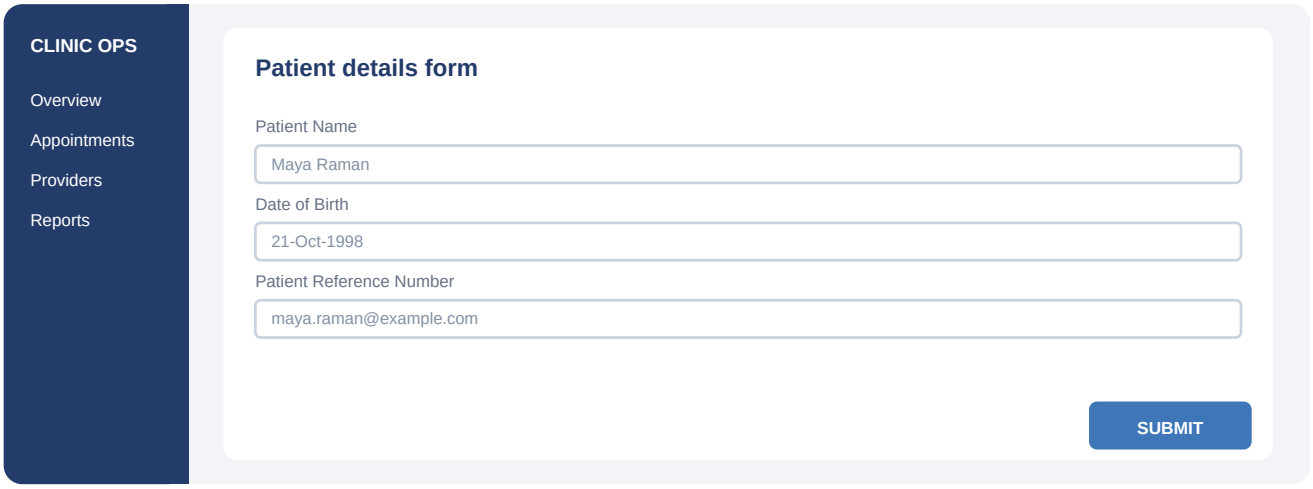

Figure 1: Patient details section — illustrative Zoho Creator-style form.

Section B — Contact Details

- Email Address (Email field)
- Contact Number (Phone field)
- Residential Address (Address field)

Figure 2: Contact details section — illustrative Zoho Creator-style form.

Section C — Visit Preferences

- Visit Mode (Radio field)
- Number of Attendees (Number field)
- Preferred Clinic Locations (Multi Select field)

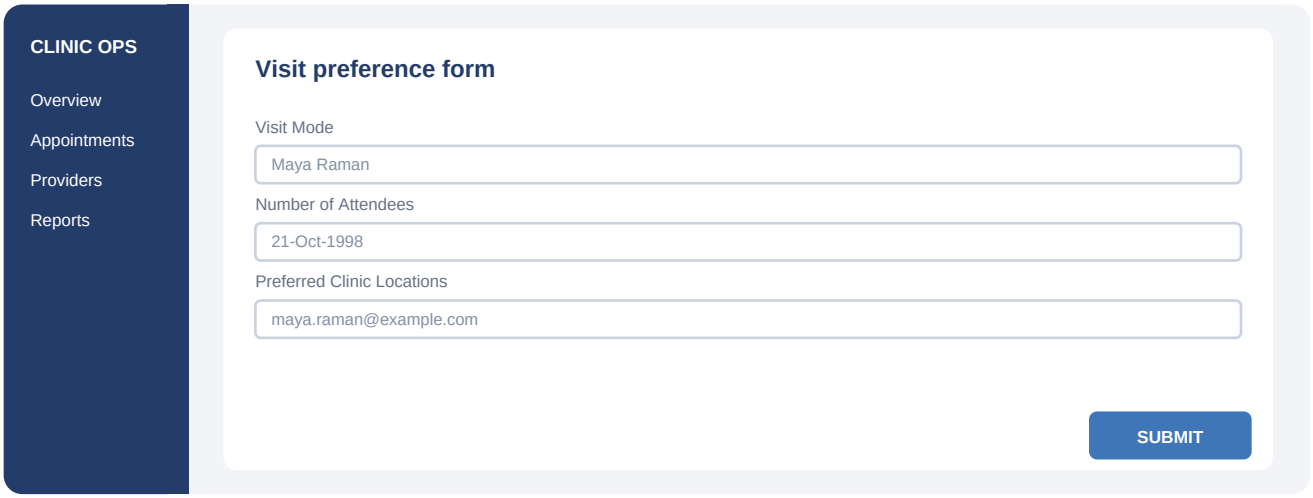

Figure 3: Visit preferences section — illustrative Zoho Creator-style form.

Section D — Appointment Request & Consent

- Appointment Type (Drop Down field)
- Visit Reason (Multi Line field)
- Preferred Appointment Time (Time field)
- Privacy Consent (Checkbox field)

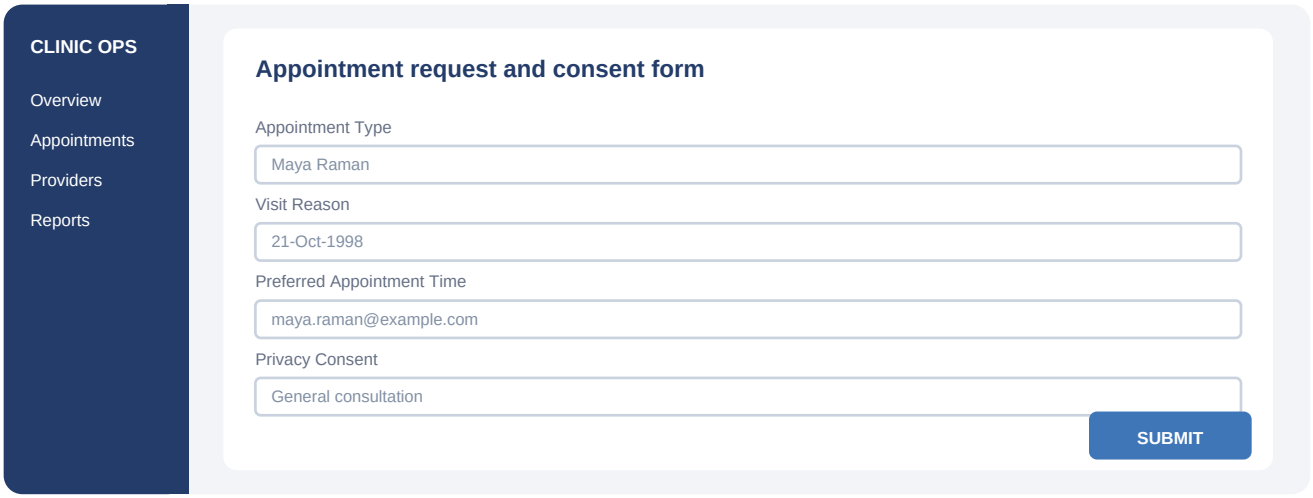

Figure 4: Appointment request and consent section — illustrative Zoho Creator-style form.

6. Validation Rules

- Patient Name, Date of Birth, Contact Number, Appointment Type, Visit Mode, and Privacy Consent are mandatory.
- Email Address must use built-in email validation; Contact Number must include a country code.
- Date of Birth must be a valid past date.
- Preferred appointment time is a request only; the form does not confirm availability until staff review.
- Duplicate open requests for the same patient and visit date should be flagged for review.
- The form displays an emergency notice directing urgent symptoms to local emergency services; it is not an emergency triage tool.

7. Workflow Summary

- Patient opens the clinic booking form.
- Patient enters identity, contact details, visit type, reason, and preferences.
- The form validates required fields and privacy consent.
- A request appears in Patient_Appointment_Report with Pending Confirmation status.
- Reception staff review provider availability and contact the patient with a confirmed slot.

8. Expected Learning Outcomes

- Use thirteen Basic Field types in a patient-friendly form.
- Organize form fields into clear intake sections.
- Apply mandatory, format, and duplicate-request checks.
- Distinguish an appointment request from a confirmed booking.

9. Result

The design specifies a patient appointment request form and reception report. Figures are illustrative mockups; live appointment availability must be connected and tested in the clinic application.
